Calix battery charger with 12V output for an immobiliser function

Calix continues to develop its products and is expanding the collection with battery charger prepared for the immobiliser function.

BC 1207 S, BC 1217 S and BC 1230 S are equipped with a 2 meter single conductor that provides a 12V signal that is intended to be used for connection to an immobiliser function.

The immobilizer function will prevent the possibility to start the vehicle as long as the Calix main supply cable is electrically connected, this is to ensure that the vehicle can't be driven away with the cable connected.

The new versions of battery charger is specifically designed for rescue and emergency vehicles where immobiliser function is commonly needed.

The chargers BC 1207 S, BC 1217 S and BC 1230 S are all powerful battery charger that fits well among Calix other professional chargers.

BC 1207 S = Battery Charger, 12 volt, 7 amps, S (=Immobiliser)

Product	Part no.	Available
BC 1207 S	1753911	Feb. 2014
BC 1217 S	1753936	Feb. 2014
